

Logitech MBJ58 Mouse Support Spring Replacement

This guide demonstrates how to replace a missing or broken scroll wheel support spring in the Logitech MBJ58 Mouse.

Written By: Conor Whatley

INTRODUCTION

You will learn how to remove and install the support spring.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Top cover

- Hold the mouse in your hand so that the bottom side is facing upward.
- Locate the #1 screw towards the bottom half of the mouse.
- Take the 4.76 mm Phillips screwdriver and unscrew the #1 screw that was previously located.

Step 2

- Place the mouse back on the hard surface, with the bottom side touching the hard surface.
- Gently, lift up the top cover of the mouse and remove.

Step 3 — Scroll Wheel

- Locate the scroll wheel on the mouse.
- Grab the scroll wheel with your thumb and index finger.
- Gently lift up to remove the scroll wheel from the mouse.

Step 4 — Support Spring

- Locate the spring on the scroll wheel. The spring looks like a small, metal piece of wire, coiled up in the middle.
- Very carefully, remove the spring from the wheel scroll.

Step 5 — Attaching the New Spring

- Replace the spring making sure it is placed on the right side of the wheel with the prongs pointing down.

i The right side is the side without the black plastic square as shown in the photos.

To reassemble your device, follow these instructions in reverse order.
